

Real-time risk intelligence

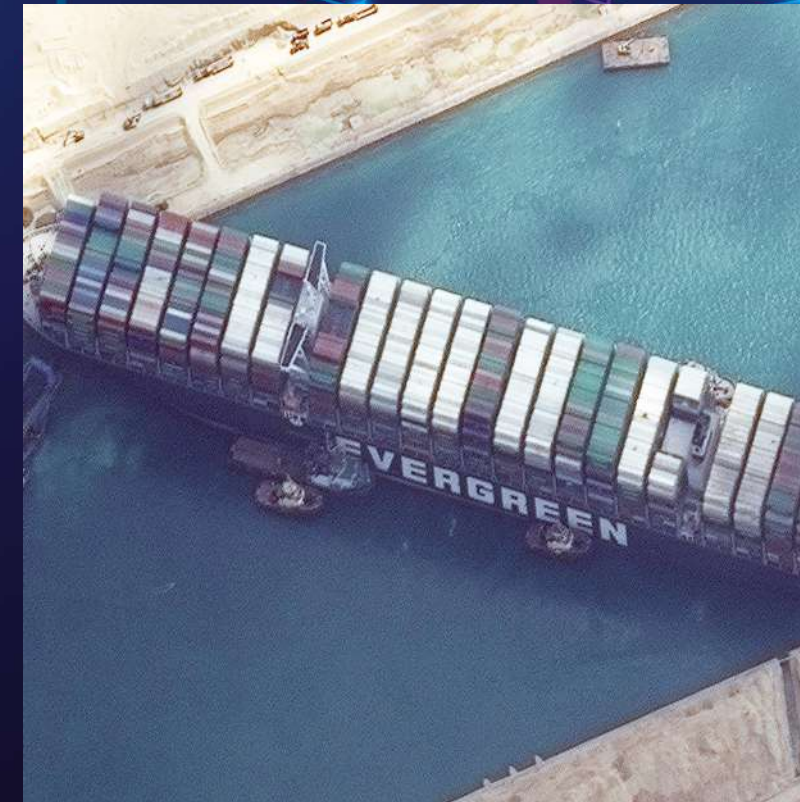

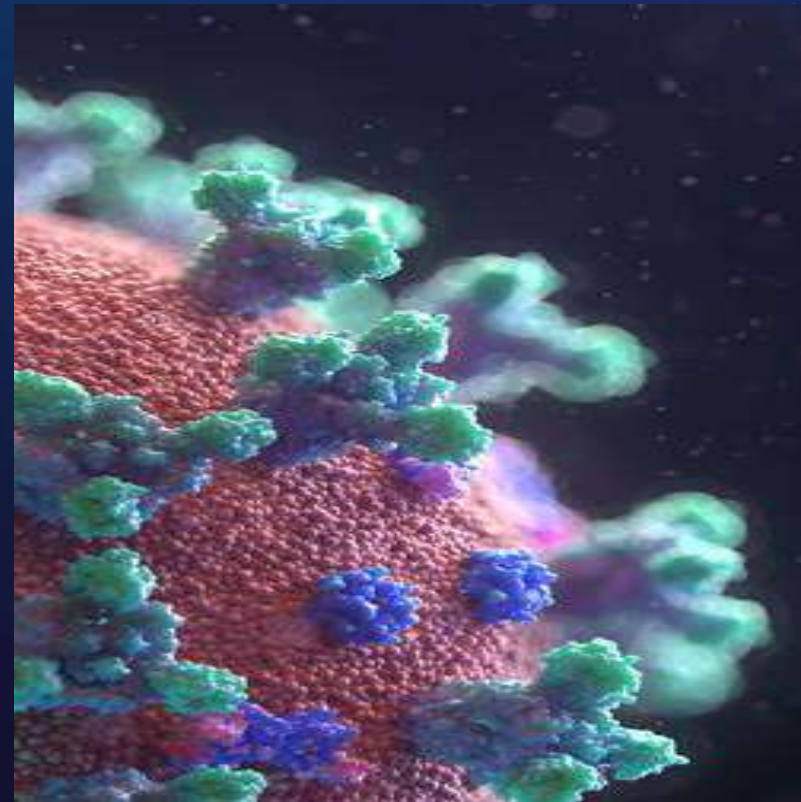

Hozint combines human and Artificial Intelligence to deliver highly relevant and timely threat alerts for travel risk, situational awareness & business continuity

About us

- ★ Hozint - Horizon Intelligence is a risk intelligence solution provider established in Brussels, Belgium, in 2014.
- ★ We provide the most cost-effective solution for realtime alerts on security & travel risk issues by combining human and Artificial Intelligence (AI).
- ★ Our team is composed of threat intelligence analysts and data scientists.

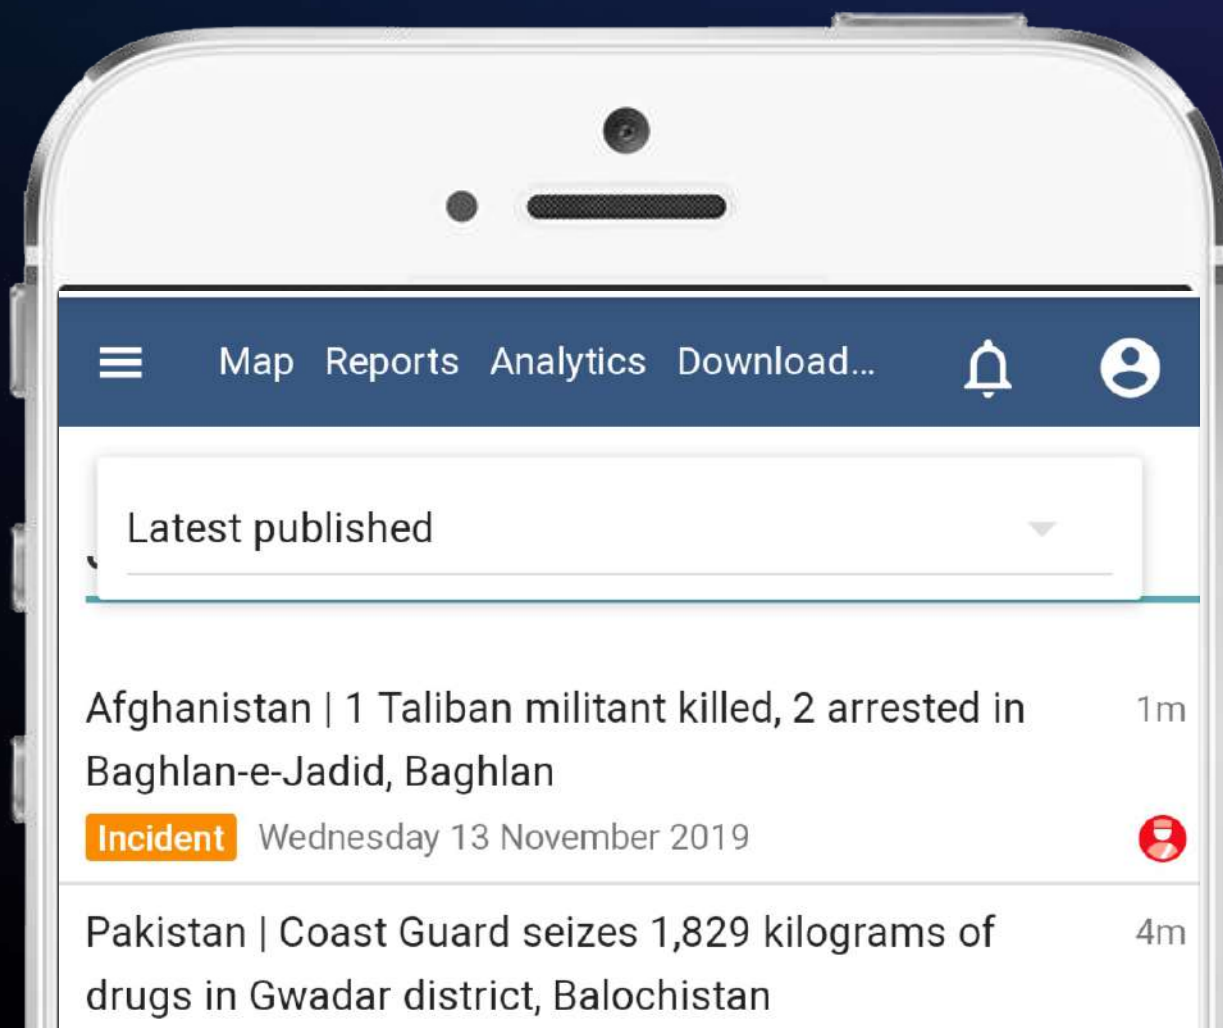

Organizations face a wide range of threats to their physical and digital security

Hozint combines human and Artificial Intelligence to help your organization mitigate risks with real-time security, travel & business continuity risk alerts

Our solution

Horizon+ combines human and AI capabilities to scan information from social media, news, and governmental websites so you can identify, verify, and be notified of any potential threats to your physical and digital security.

Granularity

How it works

LOOKOUT AI

- 
1. Relevancy filter based on Natural Language Processing
 2. Clustering similar articles on the same topic
 3. Location extraction by country and city
 4. Classification by topic (e.g. terrorism, civil unrest, etc.)
 5. Impact assessment (low, medium, high, extreme)
 6. Report dissemination (avg. 15k / day, 6 mins delay)

HORIZON

(Human filter)

1. Relevancy check
2. Source credibility check
3. Improve geo-location at POI level
4. Improve summary
5. Impact assessment check
6. Provide machine-learning feedback to the AI

OUR COMPETITIVE ADVANTAGE

HIGH RELEVANCY

The combination between human & AI ensures the highest relevancy and the lowest information noise that services that only rely on either analysts or automation cannot match.

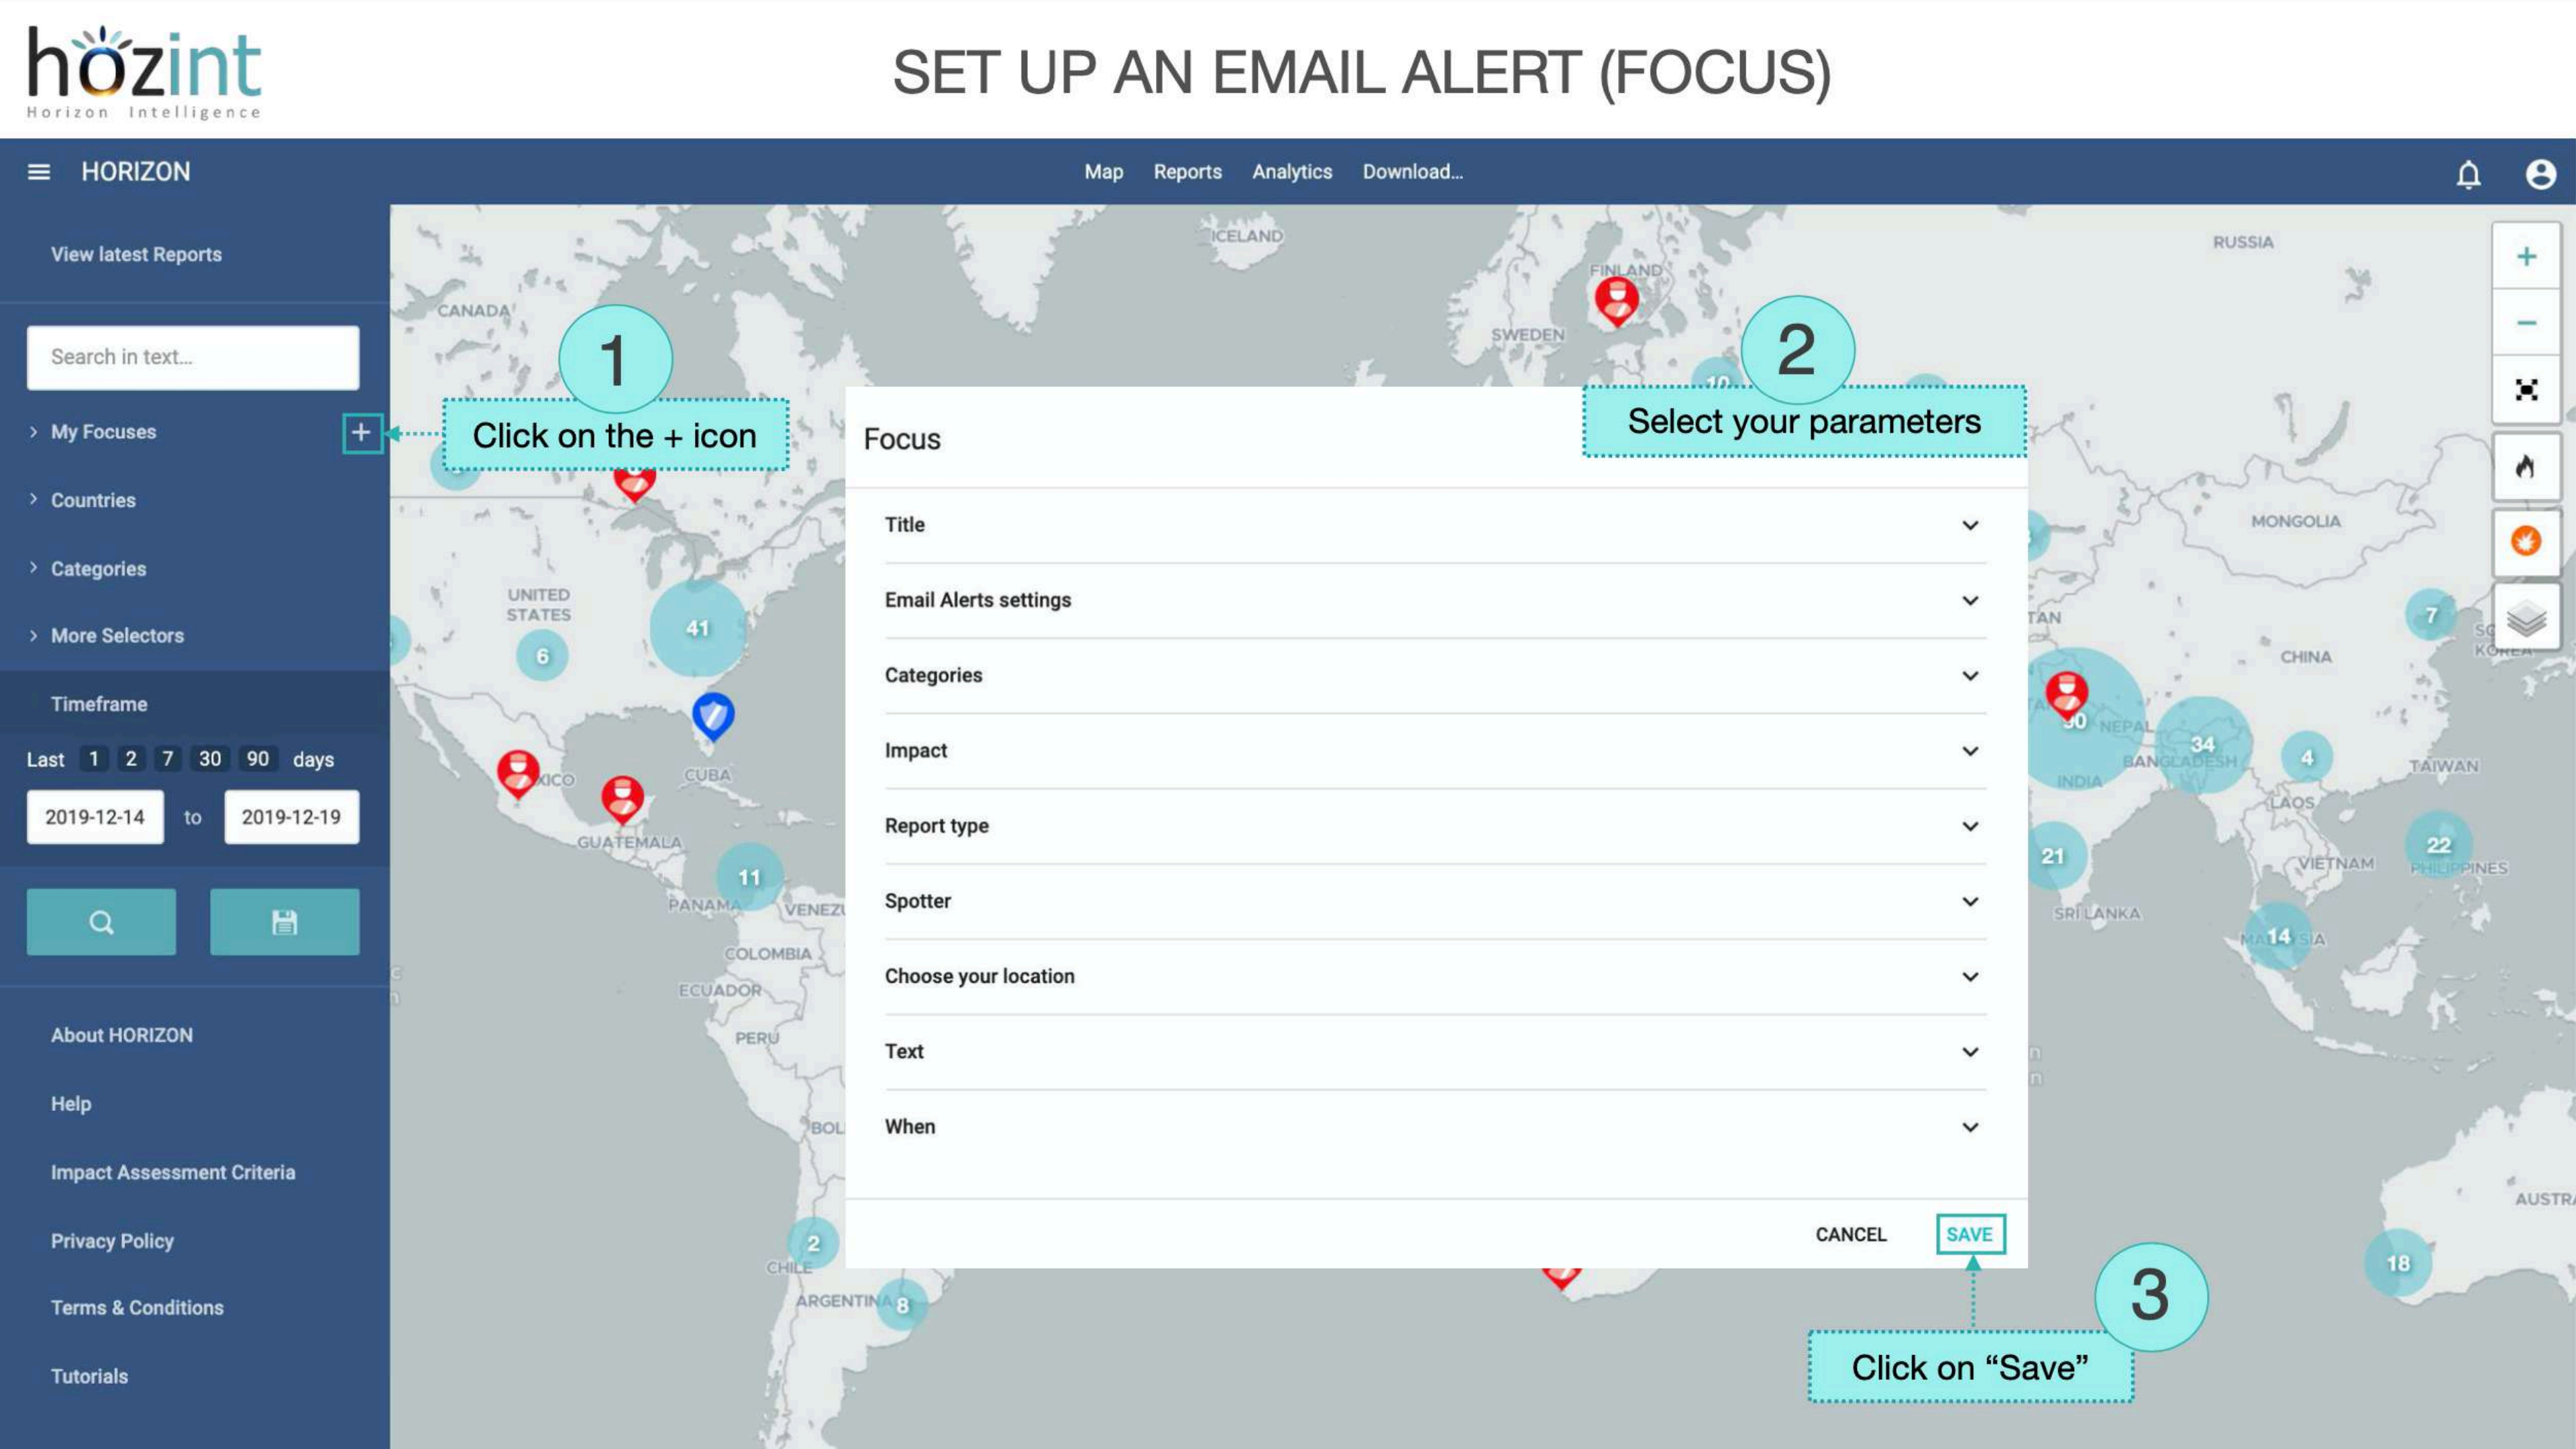

TIMELINESS

With a 6 mins delay
Horizon+ is one of the fastest threat awareness services currently available on the market;

GRANULARITY

With over 15,000 alerts / day, Horizon+ provides an unparalleled degree of granularity;
